VIGNESH KUMAR S

Data Analyst — Aspiring Data Scientist

+91-8072248819 • vignesh2906vi@gmail.com • Coimbatore, Tamil Nadu

LinkedIn • github

PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on experience in Python, SQL, Excel, and Power BI, backed by 4+ data-analytics projects spanning star-schema modeling, dashboard design, and business reporting. Comfortable cleaning messy real-world data, building DAX-driven Power BI models, and turning findings into actionable insights. Presented research at two conferences on AI; currently deepening expertise in Machine Learning and Generative AI.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Data Analytics: Microsoft Excel, Power BI, DAX, Power Query

Python Libraries: NumPy, Pandas, Matplotlib, Seaborn

Database: Oracle

Tools: Git, GitHub, VS Code, Google Colab, Cursor

Currently Learning: Big Data, Statistics

PROJECTS

Zepto Sales Performance Dashboard GitHub

- Cleaned a 1,500-order raw export with mixed date formats and inconsistent labels, standardizing categories to prepare a reliable dataset for analysis.
- Built an interactive Excel dashboard using Pivot Tables, KPI Cards, and Slicers to track performance across 3 cities and 300+ customers.
- Surfaced key revenue drivers by category, region, and payment mode, enabling faster identification of top-performing segments.

Employee Salary Analytics – Power BI GitHub

- Designed a star-schema data model with a Fact Salary table linked to Dim Employee, Dim Department, and Dim Calendar for scalable reporting.
- Conducted a data-quality audit to identify inconsistencies, duplicates, and missing values, documenting clean-up recommendations for downstream use.
- Built interactive Power BI visuals to analyze salary distribution across departments, roles, and tenure.

Retail Store Sales Analytics – Power BI GitHub

- Built a multi-year retail sales star-schema model with a Fact Sales table connected to Product, Store, Customer, and Calendar dimensions.
- Developed DAX measures to calculate revenue, profit margin, discount impact, and return-rate trends.
- Created dashboard visuals to compare store-level and product-level performance, supporting data-driven inventory and pricing decisions.

MoneyBrain – AI-Assisted Personal Finance App GitHub

- Built a cross-platform finance tracker using React Native, Expo, and TypeScript with real-time balance and expense tracking.
- Designed interactive SVG charts to visualize spending patterns and financial trends over time.
- Used AI-assisted development tools to accelerate feature development and reduce build time.

SQL Practice

- Solved 100+ SQL problems covering Joins, Subqueries, Window Functions, CTEs, Views, and Aggregations.
- Applied query optimization techniques to improve performance on larger, multi-table datasets.
- Practiced writing analytical queries for reporting scenarios similar to real-world business use cases.

EXPERIENCE

UI/UX Designing Intern, Coding Samurai Oct – Nov 2025

- Delivered assigned UI/UX design tasks on schedule during a remote internship, demonstrating initiative on new assignments.

Software Development Engineer Intern, Bluestock Fintech

- Contributed to software development tasks during the internship, gaining exposure to a fintech product environment.

Developer & Project Lead, KGiSL Institute of Technology 2022 – Present

- Led development of multiple academic software projects; coordinated planning using GitHub Projects and Notion.
- Mentored student teams, managed project workflows, and collaborated in Agile development environments.

EDUCATION

KGiSL Institute of Technology Coimbatore, Tamil Nadu
Bachelor of Engineering (Computer Science and Engineering)
2022 – 2026
CGPA: 7.86 / 10

CERTIFICATIONS

• HackerRank SQL (Basic), Jul 2026 • AICTE National Conference on Machine Learning – KGiSL IT, Aug 2025 • International Conference on SDGs – ESEC, Nov 2024

• CBIT Hacktoberfest Hackathon – CBIT, Oct 2024 • UI/UX Designing Internship – Coding Samurai, Oct–Nov 2025 • SDE Internship – Bluestock Fintech

ACHIEVEMENTS

- Presented two research papers at national/international conferences on AI-driven sustainability and real-time Indian Sign Language translation, showcasing strong **communication** and **critical thinking** skills while explaining complex technical concepts to diverse audiences.
- Participated in CBIT Hacktoberfest Hackathon 2024, collaborating with a team under time constraints to solve real-world problems, demonstrating **team collaboration**, **adaptability**, and **time management**.
- Actively publish and maintain 4+ data-analytics and full-stack projects on GitHub, applying **analytical thinking** and **problem solving** to translate raw data into actionable insights.
